DISPLAY Boards

Systemic solutions

Gallery of opportunities

The XXI century is the time of changes. In the near future commonplace display systems will be forgotten. They will be replaced by new solutions, giving a large number of possibilities and allowing to make changes in a quick and convenient way.

Omega Systems display boards are perfect example of modern trends. Thanks to them it's possible to display prints, posters, graphics and pieces of art in both indoor and outdoor locations. Our display boards are suitable for exhibitions and information campaigns.

Universalism and professionalism are main advantages of the system. Display boards are equipped with accessories essential for arrangement in various conditions and setups. Large amount of connectors, lighting systems and stabilizing bases indicate that our system is really multifunctional.

Thanks to reliability and simplicity of assembling it's possible to dispose or rearrange display boards in a fast and effortless way. The system can be also provided with transport bags.

Another asset is a high level of finishing. Our display boards are made from high quality materials. Stabilizing bases are made of enameled steel or concrete covered by esthetic plastic overlays. Aluminium profiles are defaultly anodized in a matt silver, but they can be also glossed or anodized on any colour – it's all up to you.

Our offer is all-encompassing. We are ready to prepare graphical compositions and visualizations or to indicate substantive solutions and counsels. Satisfaction of our customers is our general purpose.

Display Board

Omega **ECO** Line

Omega Eco Line is a system for indoor expositions. Thanks to light aluminium profiles it's easy to arrange it.

Boards can be arranged separately or connected into a string composed of many panels, creating a polygonal chain, a square or a triangle. Eco Line boards are connected by "semi hinge" vertical profile – they can be arranged at any angle, deploy and lodged without tools.

Display Boards

Omega **QUBE** Line

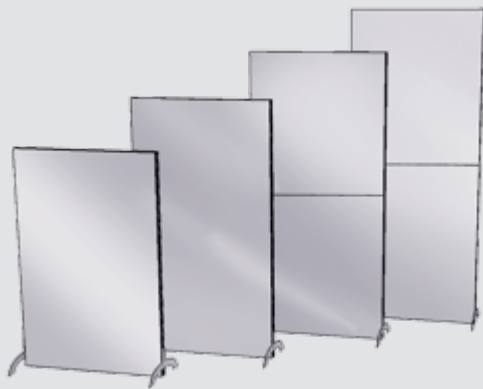

Nothing is as minimalistic and functional in once as QUBE display boards. In this system aluminium profiles are indistinguishable from a front view. Thanks to the fact information presented on display boards is perfectly highlighted.

Qube display boards are suitable as a background for posters or paintings presented in frames or clip frames. However, their main task is exposing materials. They can be printed on self adhesive foils or on cloth. In case of cloth, materials can be exposed on really big formats, up to 300 x 200cm and bigger.

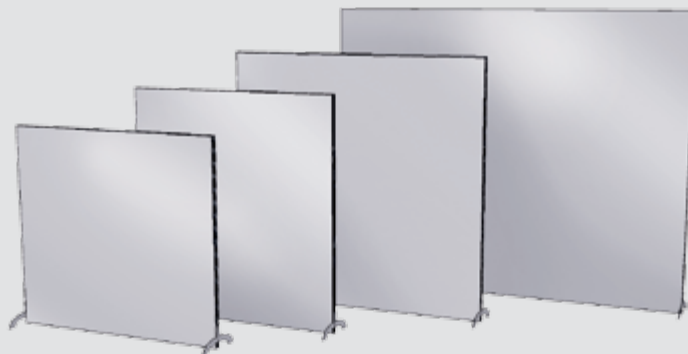

Thanks to special connectors it's possible to join Qube frames in a straight line or at any needed angle. It's a useful feature in case of dividing expositional areas. An arrangement of display boards is totally unlimited – it all depends on you.

Furthermore, QUBE display boards can be equipped with a internal lighting system for creating an unique exhibition.

■ Omega **QUBE Line** / arrangement

In case of spatial arrangements it's possible to create a indoor exhibition.
Standard or custom dimensions.

This exhibition has been arranged with the cooperation of State Museum at Majdanek. The conception of the arrangement is the authorial project of Izabela Tomaszewicz from museum exhibitional division. The exhibition was possible thanks to Omega QUBE Line frames system.

Display Boards

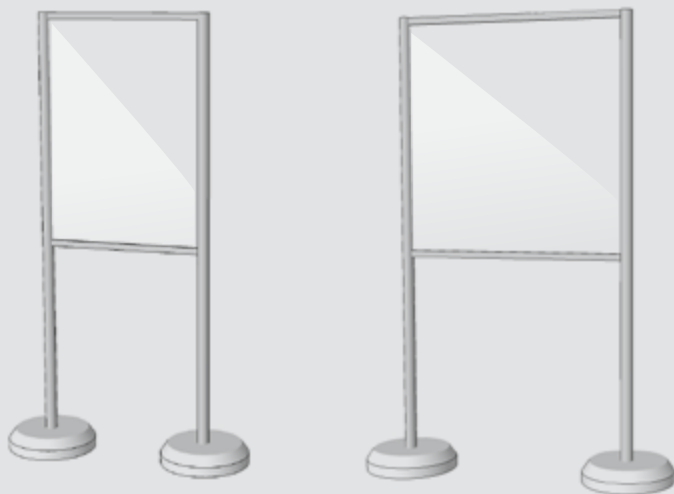

Omega **ROUND** Line for outdoor exhibition

Outdoor exhibitions require special solutions. Face up to expectations, we present Omega Round Line display boards adapted to outdoor exhibitions. The construction is durable and stable, embed in concrete bases, which are covered by esthetic, plastic covers.

Just as all other systems, those display boards can be joined together. It's possible to arrange straight lines, zigzags or quads. Most common

fulfillment is an upper panel, defaulty 70cm x 100cm or 100cm x 100cm. Presented graphics is covered by a laminate. Thanks to a optional lighting system it's possible to make all day or even night expositions.

Despite the fact that frames are well-adjusted to changing weather conditions, it's important to bear in mind about safety basics. In case of a strong wind or a storm it's recommended to relocate display boards.

SUPERSTABLE outdoor

An outdoor display is challenging because of changing weather conditions and various surfaces. Superstable display boards are equipped with four concrete basis and special system of aluminium profiles. It's a really durable construction, even in case of large display panels. The display board is composed of two 100 cm x 150 cm or 200 cm x 120 cm panels, but they can be also adjusted

to particular needs. Graphics are laminated and frames can be equipped with LED or halogen lighting.

In case of really bad weather, display boards should be additionally protected or removed.

GLASS PANELS

It's something really innovative. Those panels are made of 8 mm thick tempered glass, embed in aluminium profiles. Panels can be arranged separately or joined into more complex compositions. Those display bo-

ards are equipped with a wire display system. Besides common applications, such as displaying of images or graphics, glass panels are perfect as partition walls, separating the public and exposed exhibits.
